Are there any other comments?

There isn't a great enough supply demand for the general public for it to merit government funding.

I think expedition medicine should have a funded training programme from the NHS, but don't think it

I think as an area of medicine, expedition medicine should be accredited by the GMC as with all other

If medic is supporting British people on expeditions then it would be a good thing to have GMC accredited

Medics would gain valuable experience for their future careers

Easier to get into, better training, ensure a high standard of treatment

The curriculum is already overloaded and overwhelming so it's not justifiable to add something that will

Governance is a fundamentally important part of practice. It encourages learning as well as patient safety

Expedition medicine is an extremely valuable Avenue of medicine that requires specialist skills and should

I like shows like bear grylls the island

I may have answered differently years ago, sorry!

I expect it is a speciality and therefore some form of accreditation would be appropriate.
I don't know enough about the field to say yes to this.

This is can be captured as a subset of Emergency medicine which in truth the royal colleges help regul

Expeditions are for recreation or scientific interest, not for tax funded NHS resources to run training fo

Not sure what it is and there are likely more pressing issues that need focused on in the NHS right now

it should be something that is done privately, not as a cost to the nhs/state funded education
Expedition medicine needs formal recognition and regulation to ensure practitioners are working in ac

While I have no interest in pursuing this specialty myself, I feel that standardisation of practice is alwa
It plays an important role and doctors require a wide range of knowledge and skill to practice in challe

Practising medicine safely in a remote or expedition context requires a day job - it requires you to learn

This is a very small field that doesn't warrant the cost incurred/the resources would be disproportiona

To protect doctors and clients from legal issues

Expedition medicine mostly takes place outside the UK, the GMC has little relevance overseas. Formal

RCPSG already run a post graduate diploma for expedition medicine.

WEMS is a relatively niche area of practice, usually outside the UK and it's hard to see the NHS role he

Niche field requiring people to have extensive skills outside of the medical curriculum to be safe and e

I am in many ways an expedition medic. I get paid to teach it a couple of times a year and "work" unp

It seems like a specialty all on its own given what it entails and there should be some type of recogniti

is a great field but not relevant to the great majority of students and doctors

My experience with expedition medicine even at a medical student level has been that it will be an int

Possibly a sub-specialty of general practice or those working in acute and emergency care, with a multi

It's niche. If you do aeronautical medicine, or dive medicine, or you are a rural GP, you're not a consult

I think it is important for all doctors to have a wider knowledge with regards to what might be affectir

Makes it more accessible to trainees/raises awareness of the speciality - more people can be recruited

: is large enough of a field to require its own specialty, but rather act as a fellowship for those already trained in

sub/specialties. Expedition medicine should be regulated by a public body with limited competing interests. H

litation but don't think it's essential, provided medicine has recognised medical qualification. People on expedition

very few will pursue in future. What is important is to teach physiology and anatomy in relation to this which al
fety. By being GMC accredited, the practitioners themselves will have a standard to uphold/guidelines to go fr

accordance with the PHEM expedition medicine framework and that trainee grade doctors/practitioners are ab

ys important to ensure high quality care is provided. Without official ratification, the risk of substandard care l

n, develop and maintain skills in a clinical setting (typically GP, emergency medicine, anaesthetics) which you tl

te to what is a very well understood sector with existing and detailed guidelines from the FPHC, WMS and oth

lising training will make it more beaurecratic and restrictive. No single training syllabus will suit all types of exp

re. It might be reasonable to have a GMC role in regulation a specialist training programme, but this seems un
effective (e.g. good physical fitness, mountain skills, climbing ability). Often working in a private capacity not in

aid as an expedition medic every other year or so. I also live and work in and around Edinburgh. If you would li

tidisciplinary approach. As a paramedic, I am used to practicing generalist care in a range of environments and
:ant in that specifically, it's not necessary. Also, what benefit would it have to the majority of expedition medic:

however, I do not think expedition training should be offered by public organisations eg the NHS. I realise that I

ns in remote and unpredictable areas cant expect treatment to necessarily meet GMC standards as in UK due to

om, but patients too will have a body to protect them. I also think indemnity should cover this specifically.

becomes greater, potentially threatening the public perception of NHS medical care and trust thereof.

men take to the expedition setting (in addition to other more expedition specific clinical and non clinical skills) I

ers. What evidence is there to support a need for this? The expertise does not exist within the NHS itself to pro

meditation so one is unlikely to ever be agreed upon. It's probably better to allow national governing bodies to se

unwarranted given the size of the issue. In my experience the complexities of WEMS are related to applying rela

with limited equipment. While the undergraduate and post graduate training differs for doctors and paramedics? Expeditions and the like are almost always private affairs, and they can recruit a doctor whose training gives

this would create barriers to people wishing to train as/become expedition medics. But to me it wouldn't make

don't believe you could have the depth and breadth of clinical skills and knowledge required if you only worke

provide this training and there is no merit in NHS resources being used up on optional non NHS activities. There is

not their own standards relevant to their own sports if they feel a standard is necessary. A useful doctor for one

relatively simple skills in a challenging environment. The additional clinical areas of altitude physiology, infectious

medicine and has different focusses, I would expect to hold the same level of post graduate qualification as a doctor with them relevant experience, it doesn't necessarily need to be a speciality, most of those treated by a wilderness

e sense for publicly funded health systems to offer expedition medicine training. It wouldn't make sense for he

ed in an expedition setting. It's also not a financially viable career option as a sole entity. The scope of the NHS is

s a body of work already including the brand new US wilderness paramedic programme. Remote medicine is in

type of expedition may struggle on another, mountaineering/diving/caving/kayaking etc all fall under expediti

disease and the medicolegal/logistic issues are fairly well covered by the selection of diplomas and privately r

medic have chosen to be on said expedition or remote exercise, so a speciality in that field is not necessarily ir

health systems with finite resources to invest in such things where the population benefits would be very limited

cannot (and shouldn't) stretch to training doctors for expeditions - other non-public bodies eg the various Royal

international in scope and requirements go beyond U.K. requirements hence the wide international body of exper

the public interest as much as others. Of course there is medicine delivered to people in remote and resource

expertise already informing the field and non U.K. quals being required to fulfil most jobs (eg PHTLS) There simply

are poor environments who didn't chose to be in that situation, but in my opinion that is remote and humanitarian

isn't a problem to fix. There are also few genuine remote area medics as opposed to people who have worked

an medicine, not wilderness. Also, if I were a consultant in wilderness medicine, what would I do when I can't b

on maybe a charity trek and then folding themselves out as remote area expert medics and offering training. \

ie on expeditions, does a and e or general practice want a consultant in wilderness medicine? Possibly not. Sup

We already have the UK's leading faculty in this
